## Esca Lamp No. 1

### Mixed Materials

Esca, derived from the Latin word for lure or bait, are the small luminescent organs at the tip of the dorsal ray of female anglerfish. This luminous anatomy acts as a lure to attract prey.

The Esca Lamp expresses this underwater glow either through cast glass or skimming across cast mineral, much like an ocean floor. The shade and base halves are available in either material (or both in the same), creating a broad palette for curation and light play.
