Shown in Otter bronze and Clear glass with Hand Polished lenses

Isthmus Arm Sconce

An isthmus is a narrow piece of land connecting two larger areas across an expanse of water by which they are otherwise separated. This delicate separation is the spirit of the Isthmus series.

The cast glass components of the Isthmus Pendant are held by an asymmetric bronze encasement from above. The orientation of each pendant can be rotated as desired after installation. In the wall mounted sconce, the Isthmus pendant is supported by a milled bronze arm finished to complement the cast bronze and glass specifications.

Details at right: shown in Silver Dollar bronze and Clear glass with Cast Texture lenses

UL IST.ASCN.01

Specifications

Dimensions	in	cm
Pendant		
Height	18.75	48
Diameter	4.75	12
