Collection Bronze Patinas
except Muslin

Cast Glass Lens available in
Clear and Suede
Hand Polished or Cast Texture

Lamping

2700K
LED board and strip
20 W dimmable driver

Isthmus Sconce

An isthmus is a narrow piece of land connecting two larger areas across an expanse of water. This delicate separation is the spirit of the Isthmus series.

The cast glass lens of the Isthmus Sconce is cradled by a monumental cast bronze encasement. Through moulding techniques, the form is wrapped in a likeness of both the outside and inside surface of an armadillo's armor. An upward band of light illuminates the wall from behind.
